PROFILE

Detail-oriented IT Graduate and Application Support Engineer with hands-on experience in remote enterprise application support, IT operations, and system administration. Strong background in IT support, including hardware and software troubleshooting, system configuration, security checks, and user support. Proven ability to manage incidents within SLA timelines, support production environments, and maintain operational efficiency. I am involved in documentation, project coordination, and cross-functional collaboration, with strong leadership and communication skills in both on-site and remote environments.

KEY CAPABILITIES

- Level 1 and Level 2 application and IT support for enterprise systems in production environments.
 - Troubleshoot software, hardware, system, and access-related issues to ensure minimal downtime.
 - Manage incidents and service requests within defined SLA timelines using ticketing systems.
 - Maintain accurate technical documentation, support records, and knowledge base articles.
 - Assisted in project tracking and documentation using Primavera P6 and Microsoft Projects to support business operations.
 - Communicate with users and stakeholders, maintaining a customer-focused support approach.
-

STRENGTHS AND EXPERTISE

Java, Javascript	L1/L2 Support	Team Leadership
TCP/IP, LAN	REST API	Communication
MySQL	System Administration	Time Management
Microsoft 365	Project Tracking and Documentation	Adaptability

PROFESSIONAL EXPERIENCE

Infineon Technologies Austria

Jan 2025 - Dec 2025
